The one additional position requested in the Office of the Chief is to provide better maintenance of CIA buildings. The agency now is housed in [REDACTED] buildings in a total area of approximately [REDACTED] square feet. The recent additions of Buildings "I" and "J" and Riverside Stadium increased the building maintenance problem. Each building is now inspected once each week and at the same time, follow up and check on the status and/or completion of work is accomplished.

In the Telephone Branch the recent addition of 900 telephone lines, plus a number of new trunk lines, requires the addition of two clerical personnel, primarily for checking telephone bills. In recent months this work has been accomplished by overtime on weekday nights and weekends. The amount of moving in the agency causes unusual workloads in this activity.

Two positions are included in the daily 8:30 a.m. to 5:00 p.m. shift to permit a 15 minute break in each hour for each operator. This is a standard recommended by the Telephone Company and concurred in by this office. Also included in this shift are three positions, one as Information Supervisor, and two as Information Operators.

The above equals [REDACTED] positions needed for efficient operation of the CIA telephone switchboard.
